MERN STACK

TRAINING TR-103 REPORT DAY 3

27 JUNE 2026

Overview:

Today, I focused on **HTML Forms**, which are used to collect user input on web pages. I learned how to create forms, use the `<form>` tag with its common attributes, and explored different input types such as text, password, email, checkbox, radio button, file upload, date, time, and buttons. The practical session helped us understand how forms are used to gather and submit user information efficiently

Learning Objectives:

- Understand the purpose of HTML Forms.
- Learn the `<form>` tag and its attributes.
- Explore different HTML input types.
- Create forms to collect user information.
- Build interactive webpages using form elements.

HTML Form

An HTML form is used to collect user input and send it to a server for processing. Forms are commonly used for registration, login, feedback, surveys, and contact pages.

Common attributes of the `<form>` tag:

- **`action`** – Specifies where the form data is sent.
- **`method`** – Specifies how the data is sent (**GET** or **POST**).

Types of Common HTML Input Types

1. Text & Information Input Types: These input types are used to collect basic information from users.

    - **`text`** – Accepts single-line text such as names or usernames.
    - **`password`** – Hides the entered text for security.
    - **`email`** – Accepts only valid email addresses.

2. Selection & Choice Input Types: These input types allow users to choose one or more options.

    - **`checkbox`** – Allows selecting multiple options.
    - **`radio`** – Allows selecting only one option from a group.
    - **`color`** – Opens a color picker.
    - **`file`** – Allows users to upload files.

3. Action Buttons: Buttons are used to perform actions in a form.

    - **`submit`** – Sends the form data.
    - **`reset`** – Clears the form and restores default values.
    - **`button`** – Creates a clickable button for custom actions.
    - **`image`** – Uses an image as a submit button.

4. Number & Range Input Types: These input types are used to enter or select numeric values.

    - **`number`** – Accepts only numeric input.
    - **`range`** – Displays a slider to select a value within a range.

5. Date &Time Input Types: These input types help users select dates and times easily.

    - **`date`** – Opens a calendar to choose a date.
    - **`time`** – Opens a time picker to select the time.

Task:

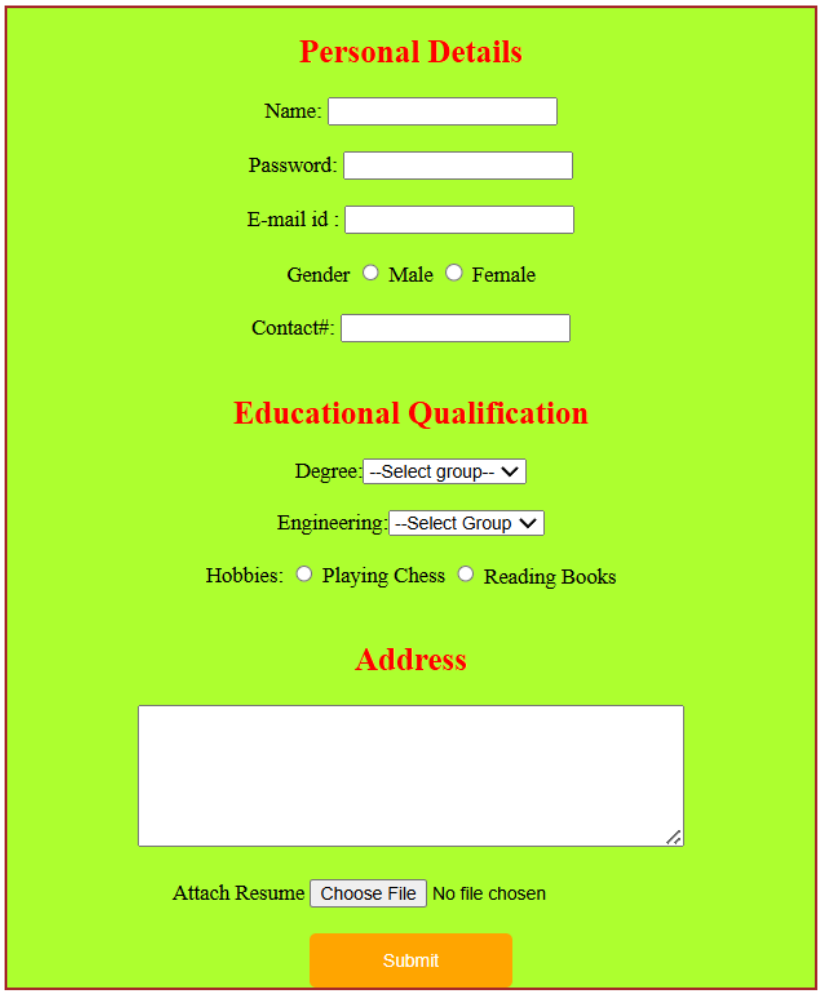

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Form</title>
    <favicon></favicon>
</head>
<body>
    <form>
    <label> Name: <input type="text" placeholder="Enter your name"></label>
    <input type="email">
    <input type="password">
    <input type="number">
    <input type="date">
    <input type="range">
    <input type="color">
    <input type="checkbox">
    <input type="radio" name="gender"> male
    <input type="radio" name="gender"> female
    <textarea></textarea>
    <input type="file">
    <input type="submit">
    <input type="reset">
    <select>
        <option>op1</option>
        <option>op2</option>
        <option>op3</option>
    </select>
</form>
```

```html
<h3>Task 1</h3>
<div style="width: 600px; margin: auto; border: 2px solid brown;text-align: center; background-color: greenyellow;">

<form >
<h2 style="color: red;">Personal Details</h2>
<label> Name: <input type="text"></label><br><br>
<label> Password: <input type="password"></label><br><br>
<label> E-mail id : <input type="email"></label><br><br>
<label> Gender <input type="radio" name="gender"> Male</label>
<input type="radio" name="gender"> Female<br><br>
<label> Contact#: <input type="number"></label><br><br>
<h2 style="color: red;">Educational Qualification</h2>
<label> Degree:<select>
    <option>--Select group--</option>
    <option>B.tech</option>
    <option>BCA</option>
    <option>BBA</option>
</select></label><br><br>

<label> Engineering:<select>
    <option>--Select Group</option>
    <option>CSE</option>
    <option>IT</option>
    <option>ECE</option>
</select></label><br><br>
<label> Hobbies: <input type="radio" name="hobby"> Playing Chess</label>
<input type="radio" name="hobby"> Reading Books<br><br>
<h2 style="color: red;">Address</h2>
<textarea style="width: 400px; height: 100px;"> </textarea> <br><br>
<label> Attach Resume
    <input type="file">
</label><br><br>
<input type="SUBMIT"style="background-color: orange; border:none; border-radius: 5px; color: white; text-align: center; height: 40px; width: 150px; padding: 10px 30px; cursor:pointer;">
```

Output:

Conclusion:

By the end of Day 3, I learned how to create HTML forms to collect user information and explored various input types used in web development. I also understood the purpose of form attributes and different buttons, which helped me build interactive and user-friendly web pages.
